

**National Interagency Coordination Center  
Incident Management Situation Report  
Wednesday, June 22, 2016 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (132 new fires)
New large incidents:	4
Large fires contained:	2
Uncontained large fires:**	18
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	4
Type 2 IMTs committed:	3

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.  
[Link](#) to Geographic Area daily reports.

**Southwest Area (PL 4)**

New fires:	31
New large incidents:	2
Uncontained large fires:	6
Type 1 IMTs committed:	2
Type 2 IMTs committed:	1

**Cedar**, Fort Apache Agency, BIA. IMT 1 (Pierson). Ten miles south of Show Low, AZ. Timber and brush. Moderate fire behavior with group torching, short crown runs, and backing. Numerous structures threatened. Evacuations and road closures in effect.

**Dog Head**, Cibola NF. IMT 1 (Day). Six miles northwest of Tajiue, NM. Timber and medium logging slash. Minimal fire behavior. Numerous structures threatened. Road, area and trail closures in effect. Evacuations have been lifted.

**Wildcat**, Kaibab NF. IMT 2 (Bales). Twenty-six miles southeast of Jacob Lake, AZ. Chaparral and short grass. No new information.

**Brown**, Southeast District, Arizona State Forestry. Fifty miles southwest of Tucson, AZ. Chaparral and tall grass. Active fire behavior with uphill runs and backing. Residences threatened.

\* **Burro**, Apache-Sitgreaves NF. Twelve miles northwest of Mule Creek, NM. Brush and tall grass. Moderate fire behavior with flanking, backing, and creeping. Residences threatened.

\* **Sage**, Truxton Canyon Agency, BIA. Twenty-eight miles northeast of Peach Springs, AZ. Timber, brush and short grass. Active fire behavior with torching. Road closures in effect.

### **Rocky Mountain Area (PL 2)**

New fires: 12  
 New large incidents: 0  
 Uncontained large fires: 5

**Short**, Buffalo Field Office, BLM. Twenty-five miles north of Recluse, WY. Timber, brush, and tall grass. Minimal fire behavior. Structures and sage grouse habitat threatened. Reduction in acreage due to more accurate mapping.

**Beaver Creek**, Routt NF. Twenty-four miles northwest of Walden, CO. Timber. No new information.

**Deer Creek**, Campbell County. Twenty-five miles southwest of Gillette, WY. Timber, brush, and tall grass. Minimal fire behavior. Sage grouse habitat threatened.

**Kelso**, Grand Mesa/Uncompahgre/Gunnison NF. Thirty-five miles south of Grand Junction, CO. Timber and brush. Moderate fire behavior with isolated torching, creeping, and backing. Last report unless significant activity occurs.

**Pitch**, Grand Mesa/Uncompahgre/Gunnison NF. Eighteen miles east of Gateway, CO. Timber and brush. Minimal fire behavior. Last report unless significant activity occurs.

### Predictive Services Discussion

Near record heat will continue across parts of the southwest and southern Great Basin as the thermal trough remains firmly entrenched beneath the upper level high pressure ridge. Southern California will experience very warm and dry conditions again, though not as severe as previous days. Warmer and drier conditions are expected across the central and northern Rockies under the ridge as southwesterly flow develops. Across the Pacific Northwest look for cool and wet weather as another system approaches from the Gulf of Alaska. A warm and breezy westerly flow will dominate the weather east of the Mississippi River. One exception will be across New England, where a cool, northwesterly flow will blow cooler air into the region from Hudson Bay. From a convective standpoint, look for two areas of concern. The first will be across the Four Corners region where isolated to widely scattered dry/marginally wet storms will develop by mid-afternoon possibly creating new fire starts. The second area is the Ohio River Valley, north to the Great Lakes, where significant severe thunderstorm activity is possible. Alaska will see a weak area of high pressure moving inland from the Bering Sea, bringing a brief period of dry conditions to the interior of the state.

## LOOKOUTS (LCES)

*Operational Engagement Category*

Lookouts are often better situated to notice the cumulative changes of fire behavior.

- Fire Order #5 says “Post lookouts when there is possible danger.” Should you utilize lookouts at all times?
  - Lookouts should be posted at all times.
- What are you looking for when you are selecting a lookout location?
  - Choose a good vantage point, preferably with a good overview of the entire area where firefighters are located, including escape routes and safety zones.
  - Never rely exclusively on aircraft as your lookout.
- What are the desired qualities, capabilities, knowledge, and responsibilities of a lookout person?
  - Experienced firefighter.
  - Solid knowledge of fire behavior and ability to recognize and monitor other environmental hazards.
  - Knowledge of crew locations, escape and safety locations and trigger points.
  - Good communicator--keeps the crew advised of fire behavior changes, tracks weather trends and relays the information, informs crew of work progress and updates from the latest strategy and tactical briefings.
  - Monitors and accounts for all individuals within his/her assigned area at all times, and will notify others if breaks are needed.
- What is the necessary equipment for a lookout?
  - PPE, radio with extra batteries, compass, binoculars, belt weather kit, IAP, map, food, water and watch.
